

STEMd ACADEMY

The signature STEMd Academy prepares students for an extensive selection of specialty Science and Maths subjects in Senior School.

Securing a place in this prestigious program means students will have the best start to their secondary schooling journey possible, facilitating a love of STEM that will extend well beyond their schooling years. Through hands-on, interactive real-world learning, students experience a plethora of challenges, experiments and experiences, each tailored in their own way to challenge and extend them in becoming 21st century thinkers and learners.

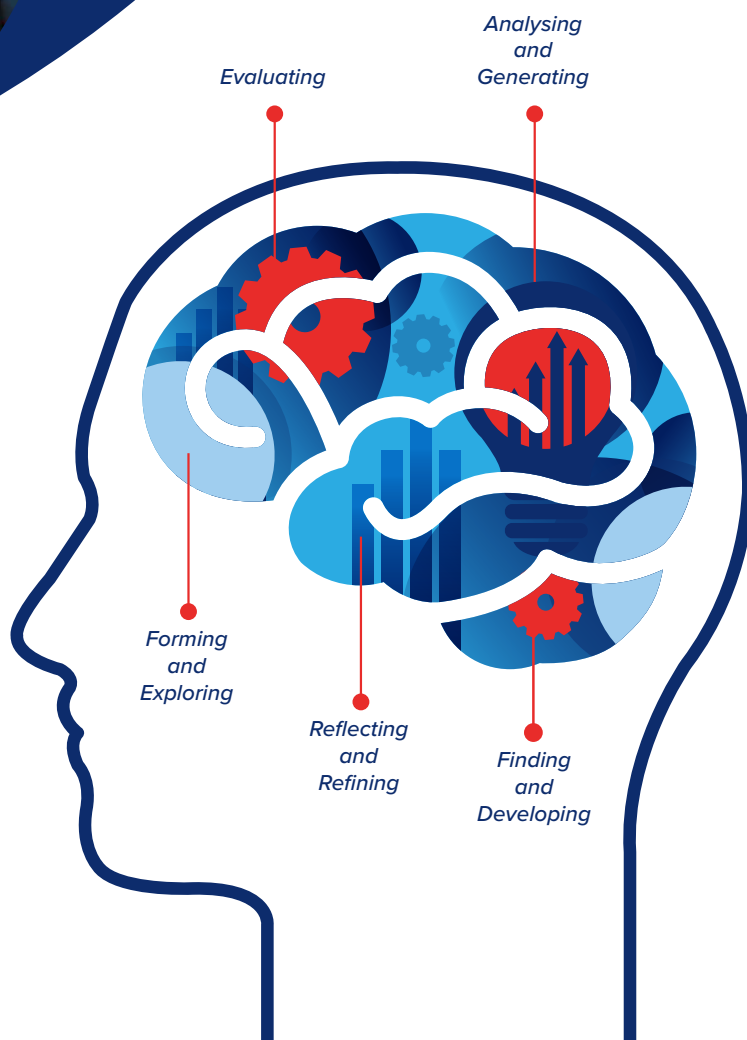

The STEMd Academy prepares students for an extensive selection of specialty science and maths subjects in senior school.

Pimpama State Secondary College boasts an offering of seven unique senior science subjects: Physics, Chemistry, Biology, Marine Science, Psychology, Engineering and Science in Practice, a selection unique to our College, ensuring students can personalise their science pathway to suit their own passions and interests.

In addition to our science offerings, Pimpama State Secondary College also offers all four senior mathematics curriculums, ensuring students in the STEMd Academy the very best possible senior pathway options. With design-thinking as our framework for innovation, we well and truly bring the field of STEM to life!
